## Assignment

**Q1. Why are CSS selectors used in HTML?**

**Q2. What are the different types of Selectors in CSS?**

**Q3. How do you include external fonts and apply them?**

Note : Please create a Google Document and write your answers and upload the shareable link of the Google Document with view access during the submission of the assignment.

## 1. Why CSS selectors are used in HTML?

Ans:-

CSS selectors are used to "find" (or select) the HTML elements you want to style. We can divide CSS selectors into five categories: Simple selectors (select elements based on name, id, class) Combinator selectors (select elements based on a specific relationship between them)

## 2. What are the different types of Selectors in CSS

Ans:-

There are 6 CSS selector types.

- CSS class selectors
- CSS id selectors
- CSS element selectors
- CSS attribute selectors
- CSS pseudo-class selectors
- CSS global selectors

### **3. How do you include external fonts and apply them?**

Ans.

Step 1: go to google font

Step 2: any font select

Step 3: copy the link

Step 4: come to HTML file

Step 5: paste in <head>
