Assignment

Q1. Why is it called a pseudo-class ?

Q2. What are gradients in CSS?

Q3. What are different types of transitions in CSS?

Note: Please create a Google Document and write your answers and upload the shareable link of the Google Document with View access during the submission of the assignment.

1. **Why is it called a pseudo-class ?**

   Ans:-

   A pseudo-class is a selector that selects elements that are in a specific state, e.g. they are the first element of their type, or they are being hovered over by the mouse pointer.

2. **What are gradients in CSS?**

   Ans:-

   CSS gradients let you display smooth transitions between two or more specified colors.
   CSS defines three types of gradients: Linear Gradients (goes down/up/left/right/diagonally)
   Radial Gradients (defined by their center) Conic Gradients (rotated around a center point)

3. **What are different types of transitions in CSS?**

   Ans:-

   Transition-delay

   Transition-duration

   Transition-property

   Transition-timing-function
